

Serv-U is a powerful, easy-to-use, award-winning FTP server created by Rob Beckers. An FTP server uses the FTP protocol to exchange files over the Internet. At startup, the user creates and configures a local copy of the directory, and then establishes a connection to the server. This connection provides access to a local copy of the directory using FTP, HTTP, Telnet, SSH, SOCKS, and HTTPS. Unfortunately, the program does not fully support all types of servers, but for most servers you will be able to access files. Serv-U comes with a large number of plugins that allow you to add and modify FTP server functionality.
