KEYMACRO is a keyboard macro recorder and editor that includes a completely new way of inputting text. Every time you click and type, the software automatically records a predefined text string and adds it to your clipboard. In addition to that, a simple GUI lets you edit, reorder and remove macros easily. The program can also be used to record mouse clicks or other actions and execute them later. KEYMACRO is the first keyboard macro editor to include a keystroke designer. With this, you can record any keystroke (including shortcuts) and assign it to a macro, making it possible to execute these actions with a single keystroke. The keystroke designer is a simple interface, which lets you easily make changes and add new keystrokes. KEYMACRO is compatible with Windows XP, Vista, 7, 8, 10 and Mac OS X. NOTE: This is not a program that will automate you work. It is only a tool that will help you improve your productivity.
