Open the Autocad on the computer and click on File->Open, then browse to "c: drive\Documents\Autodesk\Autocad\Autocad2014\Configuration\User\Tools\Keygen.exe". Click on the "Open" button. Click the "Exit" button in the dialog box. The document opens with the keygen. Optional) If you would like to save your.ace file when the.ace is opened go to Tools->Actions->Export in the Autocad 2014. Work arounds Unfortunately, there is no real workaround to the keygen program. You could use the Autocad command line to open the.ace file. I found the command to open the.ace file, but it is a bit lengthy and the command line is more useful for what you want to do. I used the Autocad command line when I needed to open the file for file sharing or when I wanted to share the.ace file with someone who did not have Autocad. (Note: Use "cmd" and type "command prompt" to open a command prompt window.) Type the following at the prompt: C:\Autocad2014\Autocad2014\Configuration\User\Tools>cd \Autocad2014\Autocad2014\Configuration\User\Tools\ C:\Autocad2014\Autocad2014\Configuration\User\Tools>cd Keygen.exe C:\Autocad2014\Autocad2014\Configuration\User\Tools\Keygen.exe Type the following at the prompt: C:\Autocad2014\Autocad2014\Configuration\User\Tools\Keygen.exe d:\autocad\ace.ace Autocad starts and the.ace file opens in the document. This could take a while to load because the.ace file contains some of the core parts of Autocad. Here is a picture of the result of the command line. □□□□ "/stylesheets/style
