It was translated and edited by Sun Tzu and published by Penguin Books in a single volume that includes both the original and the first translation of Analects of Confucius, dating to the same period, which was done by Francis Hsia. These materials withstand the constant upheaval of technological and social innovation, and continue to change in function but not in mass. With this in mind, we must address the issue of waste materials. At Buckman, we are knowledgeable about waste disposal issues, as we are all concerned about the environment as a whole. We are deeply committed to recycling, and have instituted programs that are designed to encourage our company to recycle and reuse its products for better conservation of energy and resources. Our industry relies heavily on the importation of environmentally-unfriendly materials; for example, plastics can be very difficult to recycle in the right manner and are not easily processed and reused. Buckman, with the hopes of a better future, utilizes an extensive recycling program that limits the impact on our environment, and allows us to use recycled plastics from our bought materials for our products. Buckman has been a leading manufacturer of plastic goods for many years. We create a variety of products to meet different needs, all of which eventually become waste. Our trash can be broken down into two categories: metal and organic materials.
